

Percussion Eruption

Making music together.

Percussion Eruption is a party game / experience in which players perform simple rhythms that combine into interesting and potentially complex tapestries of sound.

The rhythms range from very basic to more advanced, so shy or anxious players can be comfortable and all players can be challenged.

Game Play

Each round, players select 4 cards in any combination of difficulty level (1-2-3-4 with the easiest having 1 star and the most challenging having 4 stars).

One player taps a beat (or starts a metronome) and players perform their cards, layering on top of each other's rhythms. Each time players join in or change cards, a new and exciting composition emerges.

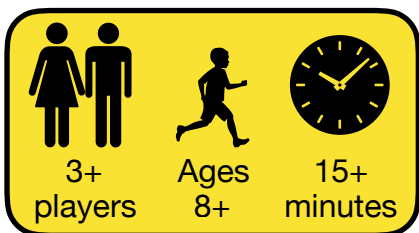

Players work together to stay in sync and experience the different combinations that arise. If you can keep it together, you win, but players soon find that Percussion Eruption is more about the music they create together.

Features

- Cooperative play
- Humor, whimsy
- Easy to understand and quick to learn
- Performing music (no music training necessary)
- Several levels of difficulty to provide easy access and challenge for advanced players
- Fun in small or large groups of friends and/or family

Components

- Standard Poker Size Cards (50-100, depending on publisher preference)
